Career Snapshot

Tech enthusiast with an outstanding academic record, strong problem-solving abilities, and proficiency in comprehending and testing software applications. Seeking opportunities as a full-stack developer and researcher to apply technical skills in innovative projects. Experienced in software development, club leadership, academic assistance, event organization, and team management, with expertise in robotics, databases, and emerging technologies.

Work Experience

Undergraduate Research Assistant
United International University • Part-time
Vatara, Dhaka

Jun 2025 – Present

- As an Undergraduate Assistant, I advanced robotics education by instructing over 70 students in electronics, leading a 40-session advanced IoT and robotics series, and researching effective learning approaches to improve introductory hardware courses. Hands-on, I independently built six benchmark systems—including SCARA and Delta arms—and am currently engineering a quadruped robot while supporting departmental evaluations.

Technical Support
Crossroads Initiative • Full-time
Kawran Bazar, Dhaka

Nov 2020 – Jan 2022

- Directed the development of community-focused web and mobile applications while managing and delivering IT solutions for internal operations and students

Education

HSC
ST. GREGORY'S HIGH SCHOOL
GPA: 5.00 / 5.00

2020

SSC
Ideal School And College
GPA: 4.89 / 5.00

2018

Bachelor of Science in Computer Science and Engineering (CSE)
United International University (UIU)
CGPA: 3.25 / 4.00 (as of Spring 2026)

Present

Honors

- Judge** – World Robot Olympiad 2026
- Speaker** – Kickstart Your Robotics and IoT Journey

2026

2025

Certifications

Python

HackerRank • Online

Credential/URL: <https://www.hackerrank.com/certificates/977c9a3298a2>

Projects

UIU Robotics Website

Mar 2025 – May 2025

Completed • Academic

Project Link: <https://robotics.uiu.ac.bd>

Designed, developed, and actively maintain the official full-stack website for the UIU Robotics Club, creating a responsive primary digital hub that significantly improves our online presence, event coordination, and overall member engagement.

Dacca Delights

Oct 2025 – Nov 2025

Completed • Professional

Project Link: <https://www.daccadelights.com/>

This is the first professional website I made outside of my academics. I designed and implemented the full project for a cloud kitchen.

Sathe Cholo

Apr 2025 – Apr 2026

Completed • Academic

Project Link: <https://github.com/SatheCholo>

SatheCholo is a cross-platform ride-sharing application where I contributed as both an AI Engineer and front-end developer. To enhance passenger safety, I developed and integrated a LoRA-tuned Large Language Model (LLM) specifically designed to detect harassment during rides.

RoboNeT – Robotics, Network and IoT Repository

Jun 2025

Ongoing • Academic

Project Link: <https://github.com/aranya170/RoboNeT-Robotics-Network-IoT-Repository>

RoboNeT is Bangladesh's first open-source robotics learning repository, designed to centralize resources across robotics, networking, the Internet of Things (IoT), and data communication. It functions as a standardized educational and development framework that empowers researchers, engineers, and students nationwide by providing modular code, data communication protocols, and a comprehensive curriculum featuring hands-on labs

DirectEdge

Mar 2025 – Jul 2025

Completed • Academic

Project Link: <https://github.com/TashinParvez/direct-edge>

A comprehensive B2B supply chain model connecting general stores, farmers, and warehouses for optimized logistics.

Kairos

Jan 2024 – Mar 2024

Completed • Academic

Project Link: <https://github.com/TashinParvez/Kairos>

A habit-tracking and productivity system designed to combat procrastination through datadriven personal growth insights.

Extracurricular Activities

UIU Robotics
President • Club

Nov 2025 – Present

As the President of the UIU Robotics Club, I direct the organization's overarching strategy, operations, and corporate partnerships. I actively mentor sub-team leads across our Software, Hardware, and R&D divisions to drive our success in national competitions, while also planning advanced technical training series like "RoboNeT in Practice." My responsibilities span comprehensive financial management, securing corporate sponsorships and overseeing the execution of large-scale initiatives, including CSE Fest, Global Robotics and Innovation Competition and the World Robot Olympiad.

UIU Robotics
R&D Secretary • Club

Mar 2024 – Nov 2025

Managed the Software and R&D teams, overseeing development pipelines, resource allocation, and innovation strategies for robotics initiatives.

World Robot Olympiad
Organizer • Volunteer

Sep 2025 – Sep 2025

Served as the main organizer for the World Robot Olympiad 2025 (Regional & National Rounds in Bangladesh), managing single-day operations for 1,200+ attendees and leading a team of 70+ volunteers.

Global Robotics &Innovation Consortium
Organizer • Volunteer

May 2026 – May 2026

Organized the Global Robotics & Innovation Consortium, directing single-day operations for 1,500+ attendees and managing a team of 50 volunteers.

Accomplishment

Champion (1st Place), CSE Project Show (Spring '24)
Achieved On March 27, 2024
Secured top honors in Database Management Systems, outperforming 60 competing teams at United International University.

Champion (1st Place), DBMS Poster Presentation
Achieved On March 27, 2024
Recognized for excellence in presenting innovative database architecture and data visualization techniques.

1st Runner Up, CSE Project Show (Summer '25)
Achieved On July 23, 2025
Achieved 2nd place for System Analysis and Design in a high-stakes competition of 105 teams
